

# Are you interested in taking part in a clinical study?

We are currently looking for people with nasal polyps.

This study will be looking at whether an investigational treatment can help people who still experience symptoms despite receiving standard treatment.

## What will the study involve?

During the study, you will be asked to:

Come for on-site clinic visits to receive study treatment

Attend appointments to have blood tests, imaging and nasal assessments

Complete questionnaires throughout the study using an electronic hand-held device

For more information, please contact:

Jennifer Boon, Clinical Research Coordinator

Pharmaceutical Research & Consulting, Inc.

214-361-5555. OR. [jennifer.boon@daac-prc.com](mailto:jennifer.boon@daac-prc.com)

## Who can join?

You may be suitable if you:

Have been diagnosed with nasal polyps for at least one year

Are 18 years of age or older

Have received standard treatment for nasal polyps for at least 30 days

Have received steroid treatment for nasal polyps in the past year **OR** previously had nasal polyp surgery
